

## [2016-New Free GreatExam Microsoft 70-413 VCE And PDF Instant Download (201-215)]

There are many companies that provide 70-413 braindumps but those are not accurate and latest ones. Preparation with GreatExam 70-413 practice test study guide is a best way to pass this certification exam in easy way. QUESTION 201 You have an IP Address Management (IPAM) server that runs Windows Server 2012 SP1. You need to integrate the IPAM server with System Center Virtual Machine Manager (SCVMM). Solution: You create a dedicated user account named IPAM\_svc, and add it to the IPAM ASM Administrators local group on the IPAM server. Does this meet the goal? A. Yes B. No Answer: B Explanation:

<https://technet.microsoft.com/en-us/.../dn249418.aspx> QUESTION 202 This question consists of two statements: One is named Assertion and the other is named Reason. Both of these statements may be true; both may be false; or one may be true, while the other may be false. To answer this question, you must first evaluate whether each statement is true on its own. If both statements are true, then you must evaluate whether the Reason (the second statement) correctly explains the Assertion (the first statement). You will then select the answer from the list of answer choices that matches your evaluation of the two statements. Assertion: You can run RENDOM command on the GLA-DC domain controller to rename the domain. Reasons: The RENDOM command is installed as part of the Active Directory Domain Services role when you promote a server to the domain controller role. The command always you to rename the domain. Evaluate the Assertion and Reason statements and choose the correct answer option. A. Both the Assertion and Reason are true, and the Reason is the correct explanation for the Assertion B. Both the Assertion and Reason are true, but the Reason is not the correct explanation for the Assertion C. The Assertion is true, but the Reason is false D. The Assertion is false, but the Reason is true E. Both the Assertion and the Reason are false. Answer: A QUESTION 203 You need to perform the directory synchronization with Office 365. What should you do first? A. Set the domain functional level to windows server 2012 B. Upgrade the office 365 licenses to Enterprise E4 C. Create a site-to-site VPN D. Set the forest functional level to Windows server 2012 E. Install the Dirsync Utility in the on-premises environment. Answer: E QUESTION 204 You need to configure the connection between the new remote branch office and the existing branch offices. What should you create? A. IP site link B. external trust C. IP subnet D. Shortcut trust Answer: A QUESTION 205 Drag and Drop Question You need to resolve the Alpine Ski House authentication issue. Which objects should you create? To answer, drag the appropriate object to the correct office. Each object may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer: domain trust, IP site link QUESTION 206 This question consists of two statements: One is named Assertion and the other is named Reason. Both of these statements may be true; both may be false; or one may be true, while the other may be false. To answer this question, you must first evaluate whether each statement is true on its own. If both statements are true, then you must evaluate whether the Reason (the second statement) correctly explains the Assertion (the first statement). You will then select the answer from the list of answer choices that matches your evaluation of the two statements. Assertion: A company is implementing smart cards to authenticate users. Users must be able to self provision their smart cards by using the One-Time Password (OTP) feature. Reason: You must configure a RADIUS server with software distribution tokens and ensure that communication ports are open, a shared secret has been created, user accounts corresponding to Active Directory Domain Services have been created on the RADIUS server, and the Remote Access server has been configured as a RADIUS authentication agent before you can configure the OTP support. Evaluate the Assertion and Reason statements and choose the correct answer option. A. Both the Assertion and Reason are true, and the Reason is the correct explanation for the Assertion B. Both the Assertion and Reason are true, but the Reason is not the correct explanation for the Assertion C. The Assertion is true, but the Reason is false D. The Assertion is false, but the Reason is true E. Both the Assertion and the Reason are false. Answer: E QUESTION 207 You need to configure the group policy for salespeople. Solution: You create a domain security group named SalesDevices and all client devices to this group. You also

create one Group Policy object(GPO) that has an Applocker policy rule that applies to SalesDevices. You link the GPO to the root of the domain.Does this meet the goal? A. YesB. NO Answer: A QUESTION 208You need to configure the Group Policy for salespeopleSolution: You move all share desktop to a separate organizational unit(OU). You create one Group Policy object that has an applocker policy rule and enable loopback policy processing within the GPO. You link the GPO to the new OU.Does this meet the goal? A. YesB. No Answer: B QUESTION 209You need to configure Active Directory Domain Services to support App1. What should you do? A. Deploy a read-only domain controller in the Madrid office by running the Windows Powershell cmdlet Install-ADDSDomaincontroller with the -NOGlobalCatalog parameter.B. Remove the Read permission from the custom Active Directory attributes for the Domain User group.C. Add a custom Active Directory attribute to the filtered attribute set.D. Add a custom Active Directory attribute to the partial attribute set. Answer: C QUESTION 210You need to recommend a trust model.What should you include in the recommendation? A. A one-way forest trust that has selective authentication.B. A one-way, external trustC. A one-way, forest trust that has domain-wide authentication.D. A two-way, external trust Answer: A QUESTION 211 You need to recommend a solution for the remote access servers.What should you include in the recommendation? A. Packet tracing B. Logging levelsC. Packet filteringD. Network address translation(NAT) Answer: C QUESTION 212Drag and Drop Question You need to configure the replication of user credentials for the Great Britain division. Answer: Pending QUESTION 213Your company has a main office and a branch office. The main office contains 2,5000 users. The branch office contains 1800 users. Each office contains three IP subnets. The company plans to deploy an Active Directory forest.You need to recommend an Active Directory infrastructure to meet the following requirements:- Ensure that the users are authenticated by using a domain controller in their respective office. - Minimize the amount of Active Directory replication traffic between the offices.Which Active Directory infrastructure should you recommend? More than one answer choice may achieve the goal. Select the BEST answer. A. Three domains and one siteB. Two domains and one sitesC. One domain and three sitesD. Three domain and Three sites Answer: D Explanation:To minimize the amount of replication traffic, create 3 domains. Each domain contain one site. <http://technet.microsoft.com/en-us/library/bb742457.aspx> QUESTION 214Your network contains an Active Directory domain named adatum.com. The domain contains an organizational unit (OU) named OU1 that contains all computer accounts for the sales department. The Computer container contains all other computer accounts.You have a Group Policy object (GPO) named Policy1 that is linked to the domain. Policy1 contains custom group policy preferences setting. You need to design a Group Policy strategy to meet the following requirements:- The security settings in Policy1 must be applied to all client computers.- Only Policy1 and other GPOs that are linked to OU1 must be applied to the client computers in OU1.What should you include in the design? A. Enable the Enforced option on all of the GPOs linked to OU1.B. Enable the Block Inheritance option on OU1. Link Policy1 to OU1.C. Enable the Block Inheritance option on OU1. Modify the GPO Status of Policy1.D. Enable the Enforced option on Policy1. Link Policy1 to OU1. Answer: BExplanation:Only Policy 1 and other GPOs that are linked to OU1 must be applied to client computers in OU1 (Enable Block Inheritance on OU1)Since Policy1 is linked at Domain level and we are enabling Block inheritance on OU1, we need to link Policy1 to OU1 so that the GPP settings apply. Note that Security Settings in a domain level GPO will always apply and bypass a block inheritance at an OU level, but questions states that there are GPP settings in the GPO that need to apply. QUESTION 215You need to plan storage to support App1.Which storage configuration should you select? A. 8 data drives aggregated in a storage spaceB. Blob container with a page BLOBC. Table storageD. 4 data drives aggregated in a dynamic disk Answer: B We give you the proper and complete training with free 70-413 GreatExam updates. Our braindumps will defiantly make you perfect to that level you can easily pass the exam in first attempt. <http://www.greatexam.com/70-413-exam-questions.html>
