A.   Configure Microsoft SharePoint Insights.B.   Configure Visio Services.C.   Configure System Center Integration with Office 365 by using private cloud integration.D.   Deploy the Microsoft System Center Operations Manager SharePoint web part.Answer: BD QUESTION 32Hotspot QuestionsYou administer the SharePoint2016 farm for a company. Servers for the farm are distributed between the company's main office and a branch office.You must make new custom solution packages to all SharePoint Servers in the farm. In the table below, identify the method to use for each group of servers. Note: Make only one selection in each column. Each correct selection is worth one point. Answer: QUESTION 33Drag and Drop QuestionsYou are a SharePoint administrator for Contoso, Ltd.You are migrating a SharePoint 2010 farm to SharePoint 2016.The SharePoint 2010farm has only classic mode web applications.You observe that the WSS_Content_Project Archive content database is not attached to the SharePoint 2013 farm.You need to migrate the SharePoint 2010 WSS_Content_Project Archive content database to an existing SharePoint 2013 claims-based web application named WebApp1.Which four actions should you perform in sequence? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order. Answer: QUESTION 34You are the administrator for a SharePoint 2016 farm.You configure a connection to the SharePoint Store. Users report that they cannot select or install specific apps from the SharePoint Store. Users can install other apps.You need to all ow users to purchase and install any type of apps from the SharePoint Store.What should you do7 A.   Activate the Internet-facing endpoints feature for apps.B.   Configure the Store settings to allow users to purchase apps.C.   Deploy an App Catalog.D.   Delete the existing App Catalog. Then, delete and provision the Subscription Setting and App Management service applications. Answer: A QUESTION 35During the upgrade from SharePoint2013 to SharePoint2016, you discover there is a missing feature. You review the logs and observe the following error message: Message: Database [WSS_Contoso_OROl] has reference(s) to a missing feature:ld= [4be9a980-965f?86f -9eda-074e284875d7).Remedy: The feature with ld 4be9a980-965f-486f-9eda-074e284875d7 is referenced in the database [WSS_Contoso_OROl], but is not installed on the current farm. The missing feature may cause upgrade to fail. Please install any solution which contains the feature and restart upgrade if necessary.You need to identify the page that is missing the feature. Which of the following will identify the page? A.   On the SharePoint Server,run the following Windows PowerShell command: Test-SPContentDatabase-NarneSdbName-WebApplication $wa I Select Category, Message I Where {$_.Category-eq "MissingFeature"}B.   On the SharePoint Server, run the following Windows PowerShell command: Test-SPContentDatabase-NameSdbName-WebApplication $wa I Select Category, Message I Where{$_.Category-eq "MissingSetupFile"}C.   On the SQL Server, run the following SQL syntax against WSS_Contoso_OROl:SELECT Featureld, FuiiURL From Webslnner JOIN FeaturesOn Webs.ld=Features.Webld WHERE Featureld='4be9a980-965f-486f-9eda-074e284875d7'0RDERBYFeatureldD.   On the SharePoint Server, review the Health Analyzer and find the missing dependencies. Answer: A QUESTION 36Drag and Drop QuestionsYou are the SharePoint administrator for your organization. You have one web application named WebApp1 in the farm.You need to prevent users from purchasing apps from the SharePoint Store while allowing users to request apps from the App Catalog.Which three actions should you perform in sequence? To answer, move the appropriate actions form the list of actions to the answer area and arrange them in the correct order. Answer: QUESTION 37Drag and Drop QuestionsYou manage the SharePoint2016 environment for a multinational company with 195 offices in 57 different regions. Each department in the company has its own site collection. Business users have Contribute access to their own department sites and Read access to all other department sites.You have the following requirements: - Maintain a standardized list of office locations across all departments. - Track the office location as metadata for contract documents that are stored in each of the departmental site collections.- Business users must be able to add new office locations directly when they save new files to SharePoint. - When a user adds a new office location, the location information must be accessible to all users for use on other documents. You need to configure SharePoint to track office location for contract documents.Which three actions should you perform in sequence?To answer, move the appropriate actions from the Iist of actions to the answer area and arrange them in the correct order. Answer: QUESTION 38Drag and Drop QuestionsYou are the

administrator for a company's SharePoint 2016 farm. Employees use Search functionality extensively. Employees report that display as they enter queries are often irrelevant. You identify the following requirements: - You must add several specific search refiners to Search results pages. - You must expand query results by using synonyms for search keywords. - You need to implement the improvements to search functionality. For each requirement, which action should you perform? To answer, drag the appropriate action to the correct requirement. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.Note: Each correct selection is worth one point.   Answer: QUESTION 39Hotspot QuestionsYou are a SharePoint administrator. You set up a publishing website that is based on product catalogue data. You are configuring Search to retrieve and display content from the publishing website. Content managers have site collection administrator permissions. You need to ensure that multiple crawls can occur for the same content at the same time. What should you do? To answer, select the appropriate value from each list in the answer area. Answer: QUESTION 40Drag and Drop QuestionsA company uses SharePoint Online and SharePoint Server 2016 on-premises. You need to configure two-way federated search between SharePoint Online and SharePoint Server on-premises.How should you configure federated search? To answer, drag the appropriate option to the correct result source and remote providers. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.Note: Each correct selection is worth one point. Answer: QUESTION 41In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem.Once you answer a question in this section you will NOT be able to return to it. As a result, these questions will not appear in the review screen.Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.You are the SharePoint administrator for a company.You must provide an on-premises SharePoint solution that helps monitor and analyze your business in order to make informed business decisions that align with the objectives and strategies for the company.The solution must include the following features: - Dashboards- Scorecards- Key Performance Indicators (KPI) You install and configure Office Online Server.Does the solution meet the goal? A.   YesB.   No Answer: B QUESTION 42In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem.Once you answer a question in this section you will NOT be able to return to it. As a result, these questions will not appear in the review screen.Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. You are the SharePoint administrator for a company.You must provide an on-premises SharePoint solution that helps monitor and analyze your business in order to make informed business decisions that align with the objectives and strategies for the company.The solution must include the following features: - Dashboards- Scorecards- Key Performance Indicators (KPI) You configure Power Bl.Does the solution meet the goal? A.   YesB.   No Answer: B Case Study 3 - Tailspin Toys (QUESTION 43 - QUESTION 52)BackgroundTailspin Toys manufactures and sells toys and games. The company also resells board games. The new chief executive officer (CEO) recently launched an effort to update the company's information technology (IT) infrastructure. The CEO wants a blog site to provide updates in plain text about the progress of company projects and the overall health of the company to employees. Content from this site will be used to populate some content on the internet-facing site.You hire a consultant to design and deploy a SharePoint farm. The company plans to use the farm to create internal collaboration sites, and e-commerce site, and a place to display public announcements. The following diagram shows the topology of the SharePoint farm: GeneralYou must create a separate site collection for each department. You must base each site collection on the Team site template. The direct URL for each site collection must use the following format: http://departmentname.tailspin.com.You must place the site collections for all departments in the same web application, if possible. You must place the site collection for departments that have unique requirements in separate web applications. Business continuity You identify the following requirements related to continuity of the business:- All SharePoint services must be highly available.- The SharePoint environment must be able to withstand the failure of a single system without affecting accessibiIity. You must monitor the SharePoint environment to ensure that systems are available and that response times meet service level agreements (SLAs). In the event the times are not within the required thresholds, the system must alert SharePoint administrators. You must create a site that allows department managers to view the performance data that has been collected. The use of additional monitoring software will be performed where it can be justified. Governance and securityGovernance requirements- Marketing department employees may create team sites. All other sites must be created by members of the information technology (IT) administration staff.- You must handle requests for new sites by using a Help Desk site on SharePoint - The corporate taxonomy must be managed

by the SharePoint administrative staff. Users must not be allowed to create their own information architecture. Exceptions to this requirement will be handled on a case by case basis.- All information in SharePoint must be consistently identified and readily accessible by using searches. Search components must be configured to provide the best search results while minimizing administrative overhead. Security requirementsAnonymous access is only permitted for Internet-facing sites. Authentication is required for all sites. Authentication must occur through the Active Directory Domain Services environment. All custom apps must be installed and managed by the SharePoint administrative staff. Any requests for new apps must be submitted through the Help Desk site. Hardware and storageHardware requirementsYou must minimize the number of servers and applications whenever possible. You must only deploy additional servers and applications if the requesting department manager provides the appropriate documentation to support the need. File storage requirementsContent must not be stored in the perimeter network. All access to SharePoint content from the Internet must be handled through servers in the perimeter network. Human resources (HR) data must be kept separate from all other data. HR departmentThe HR manager needs a website to implement time management and leave requests. The HR manager has found an app that will provide this functionality on a SharePoint independent software vendor website, and would prefer to use this app as opposed to creating a custom in-house app. This app will only need to access to data in the HR site collection.You must create a site for the HR department that allows new employees to read required documents regarding policies and procedures. The site must also provide all employees access to other HR documentation such as the employee handbook, employee leave procedures, and acceptable use guides. IT departmentYou must implement a Help Desk website and associated workflows. To create the site, you must access data from a Microsoft Excel workbook into a SQL Server database by using an SQL Server Integration Services (SSIS) package. You must access data from other data sources. Employees must be able to fill out a help request on the site and then check the status of the request. The IT department staff must be able to respond to the requests, update the status of requests, and close requests. IT department managers must be able to track the status of requests, and generate reports on the progress of requests. Marketing departmentCollaboration sitesMarketing department employees must be able to create their own collaboration sites in SharePoint The collaboration sites will be used for new product release discussions and marketing plans related to those new products. The URL for the collaboration sites must use the format: /products/product name. Custom termsThe marketing department must be able to use custom terms when identifying marketing strategies. Other departments must not be able to use custom terms. This requirement has been approved by management. Public-facing sitesYou must create a site for the marketing department that provides information to potential customers about the current product line and any products in development. The marketing team must be able to access this site by using their mobile devices. Sales departmentThe sales manager needs a site to display sales progress data. The site must include KPIs and metrics that are generated by using information from a database stored on a SQL Server. Sales department employees are often away from the office. They must be able to access SharePoint data from external locations and when they are offline. Sales department employees need a site that customers can access to purchase products and check on the status of orders QUESTION 43Hotspot QuestionsYou need to deploy the HR app.Which options should you recommend? To answer, select the appropriate setting from each list in the answer area. Answer: Explanation: https://support.office.com/en-gb/article/Add-an-app-to-a-site-ef9c0dbd-7fe1-4715-a1b0-fe3bc81317cb https://technet.microsoft.com/en-us/library/jj219576.aspx QUESTION 44You need to implement the Sales Progress website. Which service application should you create and configure? A. a Business Data Connectivity Service applicationB. an Application Management Service applicationC. the Access Service 2010 service applicationD. the PerformancePoint Service application Answer: D QUESTION 45You need to implement the HR department site collection. What should you do first? A. Create a wildcard inclusion managed path in the HR web application.B. Create a web application for the HR department.C. Create a wildcard inclusion managed path in the web application for the departments.D. Create a content database in the web application for the departments. Answer: B Lead2pass.com is best place to prepare your 70-339 exam with 100% reliable study guide.
